

Runner for Casting

EG RUNNER

Kao developed **New RUNNER** for Casting based on new technology of us. We can get the high performance and workability compare with ceramic runner.

Features

- ◇ Environment-friendly Runner made of recycle pulp
 - ➔ small dust after pouring and less small particle at cutting process
- ◇ Improve workability of molding
 - ➔ easy to transport due to light weight and tough material
 - easy to set and connect due to the socket of them

EG RUNNER (ϕ 30)

straight elbow corn tee

Molding

After pouring

Thin carbonized film after pouring
